

SMARC 2.1.1™ /SimpleSwitch

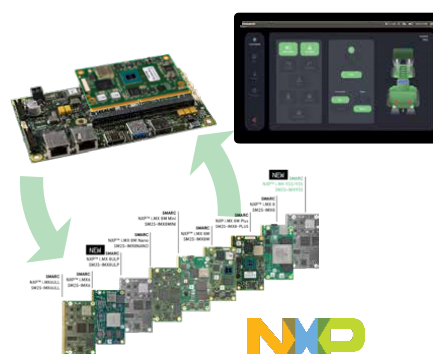

A man with glasses is seen from the side, working at a desk. He is looking at two computer monitors. The monitor on the left shows a dashboard with a line chart and a table of data. The monitor on the right shows a code editor with a list of tasks or a code file. The man is wearing a light blue shirt. The background is dark and out of focus.

Providing the same environment as the physical hardware (Linux & hardware interfaces) allows a seamless deployment to your SMARC module after delivery.

[illegible]

Adapt in performance, computing technology, and interfaces. Realize architecture adjustments due to end-of-lifetime or allocation without software application re-design.

Design an innovative and use case specific UI application providing the best possible user experience.

MSC SM2S-MB-EP5
Embedded Platform **SMARC[®] 2.X**

APPLICATION-READY EMBEDDED PLATFORM

SimpleFlex is the intelligent combination of a standard Computer-On-Module with a standard carrier board. It combines the advantages of Standard SBC and Custom SBC by choosing the COM from a huge portfolio of CPU and memory configuration.

 146 x 80 mm

Arm

x86

- Low-cost, flexible Platform for medium to high volume
- Up to 2x Gigabit Ethernet
- Mini PCI Express, M.2 key B, Micro-SD
- 2x USB 3.0, 3x USB 2.0, 1x USB 2.0 MicroAB Host/Client
- RS-232/RS-485/CAN (opt. galv. Isolated)
- DisplayPort, LVDS, MIPI-DSI, eDP, μ HDMI
- USB Type-C[™] (with DisplayPort)
- Audio, opt. with 2x 2.5W Stereo Amplifier
- MIPI-CSI, 12 GPIO, SPI, I²C
- WLAN / Bluetooth
- NFC with antenna (option)
- Input voltage 10VDC to 36VDC
