Rev. 0.3, Aug 18, 2021

Product Sheet

PRODUCT OUTLINE

MSC DISPLAY KITS

The MSC Display Kits are ideal companions for the whole range of MSC Computer-On-Module (COM) carrier boards and Starterkits. They come in different popular sizes and resolutions, and immediately fit the LVDS and backlight outputs of the baseboards. The MSC Display Kits comprise a high-performance LCD panel and capacitive touch assembly, complete with PCAP touch controller and suitable cables for direct out-of-the-box experience with no installation hassles.

MSC DIS-AM1280800-101-KIT

This Display Kit was put together specifically for applications requiring moderately-sized displays at medium resolution. The kit features the SimplePlus platform consisting of a 10.1" WXGA (1280 x 800) LCD panel with optically-bonded PCAP (projected capacitive) touch panel and cover lens, held together in a stable metal frame. A dedicated 3-way display cable is provided as well as an FFC-to-USBmini adapter together with a suitable USBmini-to-USB cable for touch.

Specification Highlights

- 10.1 (16:9) inch active display area with WVGA (1280 by 800 pixel) resolution
- 16M colors (R, G, B 8 bit digital each)
