1.0 General Descriptions

7 inch Amorphous-TFT-LCD (Thin Film Transistor Liquid Crystal Display) module.

This module is composed of a 7" TFT-LCD panel and backlight unit.

1.1 Features

- 7 inch (16:9 diagonal) configuration
- 16.7M colors (R, G, B, 8bit digital each)
- RoHS
- New LCD FOG

1.2 Product Summary

NO	Item	Specification	Remark
1	LCD Size	7.0 inch (Diagonal)	
3	Resolution	800 x 3 (RGB) x 480	
4	Display Mode	Normally Black.	
5	Pixel pitch	0.1905 (W) x 0.1905(H) mm	
6	Active area	152.4(W) x 91.44(H) mm	
7	Module Size	165(W) x 104.4(H) x 11.31(T) mm	Note 1
8	interface	LVDS	
9	Color arrangement	RGB-stripe	
10	Luminance	1500 cd/m ²	cd/m ²
11	Viewing Direction	All direction	

(Note1) Refer to the mechanical drawing.

2.0 Absolute Maximum Ratings

Item	Symbol	Min.	Max.	Unit	Remakes
Supply Voltage	V_{DD}	-0.3	3.6	V	-
Input Voltage of Logic	VI	-0.3	V _{DD} +0.3	V	Note 1
Operating Temperature	T _{OP}	-30	85	$^{\circ}\!\mathbb{C}$	Note 2
Storage Temperature	T _{ST}	-30	85	$^{\circ}\!\mathbb{C}$	Note 2

- Note 1: The rating is defined for the signal voltages of the interface such as CLK and pixel data pairs.
- Note2: The maximum rating is defined as above based on the chamber temperature, which might be different from ambient temperature after assembling the panel into the application. Moreover, some temperature-related phenomenon as below needed to be noticed:
 - Background color, contrast and response time would be different in temperatures other than 25 $^\circ\!\mathbb{C}$.
 - -Operating under high temperature will shorten LED lifetime.

3.0 ELECTRICAL CHARACTERISTICS

3.1 LCD CHARACTERISTICS

Note:

- (1) The supply voltage of the external system for the module input should be the same as the definition of VDD.
- (2) Apply the lamp voltage within the LCD operation range. When the back-light turns on before the LCD operation or the LCD turns off before the back-light turns off, the display may momentarily become white.
- (3) In case of VDD = off level, please keep the level of input signal on the low or keep a high impedance.
- (4) TP4 should be measured after the module has been fully discharged between power off and on period.
- (5) Interface signal shall not be kept at high impedance when the power is on.

Test Conditions:

Date: 2021/03/04

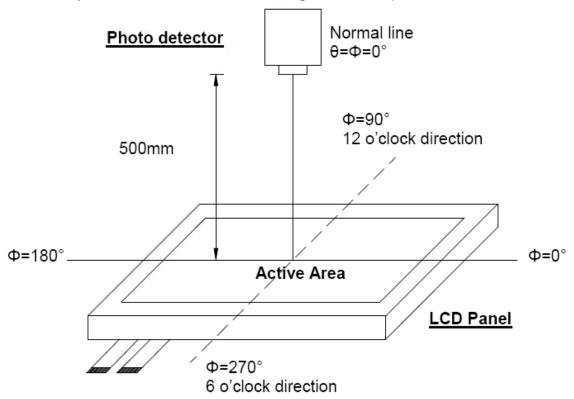

- 1. ILED= 250mA, the ambient temperature is 25℃.
- 2. The test systems refer to Note 1 and Note2.

Note 1: Definition of optical measurement system.

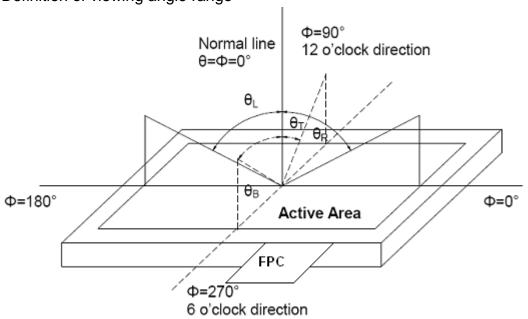

The optical characteristics should be measured in dark room. After 10 Minutes operation, the optical properties are measured at the center point of the LCD screen. All input terminals LCD panel must be ground when measuring the center area of the panel.

Note 1: Definition of optical measurement system.

The optical characteristics should be measured in dark room. After 30 minutes operation, the optical properties are measured at the center point of the LCD screen. (Response time is measured by Photo detector TOPCON BM-7, other items are measured by BM-5A/Field of view: 1° / Height: 500mm.)

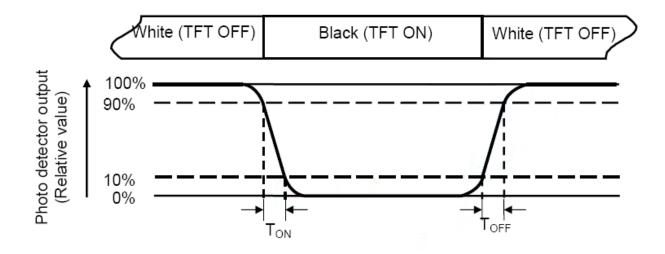

2: Definition of viewing angle range

Note

Note 3: Definition of Response time

The response time is defined as the LCD optical switching time interval between "White" state and "Black" state. Rise time (Ton) is the time between photo detector output intensity changed from 90% to 10%. And fall time (Toff) is the time between photo detector output intensity changed from 10% to 90%.

Note 4: Definition of contrast ratio

Date: 2021/03/04

Note 5 : Definition of color chromaticity (CIE1931)

Color coordinated measured at center point of LCD.

Note 6 : All input terminals LCD panel must be ground when measuring the center area of the panel.

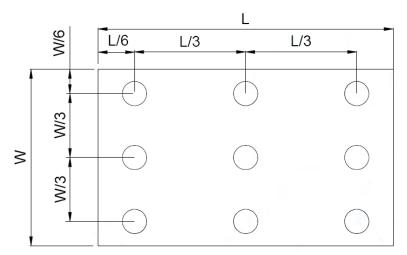

Note 7: Definition of Luminance Uniformity

Active area is divided into 9 measuring areas (Refer to bellow figure). Every measuring point is placed at the center of each measuring area.

Luminance Uniformity (Yu) = ———

Bmax

L ----- Active area length W ----- Active area width

B_{max}: The measured maximum luminance of all measurement position.

Bmin: The measured minimum luminance of all measurement position.

8.0 Reliability Test Items

Test Item	Test Conditions	Note

Vibration Test (Packing)	Sweep frequency: 10 ~ 55 ~ 10 Hz/1min Amplitude: 0.75mm Test direction: X.Y.Z/3 axis Duration: 30min/each axis	2

- Note(1) Condensation of water is not permitted on the module.
- Note(2) The module should be inspected after 1 hour storage in normal conditions (15-35°C, 45-65%RH).
- Note(3) The module shouldn't be tested more than one condition, and all the test conditions are independent.
- Note(4) All the reliability tests should be done without protective film on the module. Definitions of life end point:
 - Current drain should be smaller than the specific value.
 - Function of the module should be maintained.
 - Appearance and display quality should not have degraded noticeably.
 - Contrast ratio should be greater than 50% of the initial value.

9. GENERAL PRECAUTION

9.1 Use Restriction

This product is not authorized for use in life supporting systems, aircraft navigation control systems, military systems and any other application where performance failure could be life-threatening or otherwise catastrophic.

9.2 Disassembling or Modification

Do not disassemble or modify the module. It may damage sensitive parts inside LCD module, and may cause scratches or dust on the display. AMPIRE does not warrant the module, if customers disassemble or modify the module.

9.3 Breakage of LCD Panel

- (1) If LCD panel is broken and liquid crystal spills out, do not ingest or inhale liquid crystal, and do not contact liquid crystal with skin.
- (2) If liquid crystal contacts mouth or eyes, rinse out with water immediately.
- (3) If liquid crystal contacts skin or cloths, wash it off immediately with alcohol and rinse thoroughly with water.
- (4) Handle carefully with chips of glass that may cause injury, when the glass is broken.

9.4 Electric Shock

Date: 2021/03/04

- (1) Disconnect power supply before handling LCD module.
- (2) Do not pull or fold the LED cable.
- (3) Do not touch the parts inside LCD modules and the fluorescent LED's connector or cables in order to prevent electric shock.

9.5 Absolute Maximum Ratings and Power Protection Circuit

- (1) Do not exceed the absolute maximum rating values, such as the supply voltage variation, input voltage variation, variation in parts' parameters, environmental temperature, etc., otherwise LCD module may be damaged.
- (2) Please do not leave LCD module in the environment of high humidity and high temperature for a long time.
- (3) It's recommended to employ protection circuit for power supply.

9.6 Operation

- (1) Do not touch, push or rub the polarizer with anything harder than HB pencil lead.
- (2) Use fingerstalls of soft gloves in order to keep clean display quality, when persons handle the LCD module for incoming inspection or assembly.
- (3) When the surface is dusty, please wipe gently with absorbent cotton or other soft material.
- (4) Wipe off saliva or water drops as soon as possible. If saliva or water drops contact with polarizer for a long time, they may cause deformation or color fading.
- (5) When cleaning the adhesives, please use absorbent cotton wetted with a little petroleum benzene or other adequate solvent.

9.7 Mechanism

(1) Please mount LCD module by using mounting holes arranged in four corners tightly.

9.8 Static Electricity

- (1) Protection film must remove very slowly from the surface of LCD module to prevent from electrostatic occurrence.
- (2) Because LCD modules use CMOS-IC on circuit board and TFT-LCD panel, it is very weak to electrostatic discharge. Please be careful with electrostatic discharge. Persons who handle the module should be grounded through adequate methods.

9.9 Strong Light Exposure

The module shall not be exposed under strong light such as direct sunlight. Otherwise, display characteristics may be changed.

9.10 Disposal

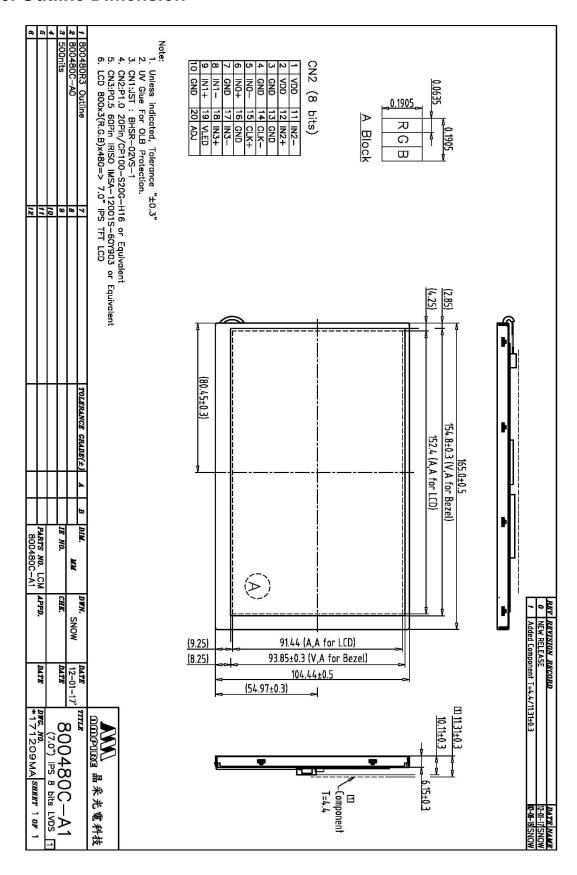

When disposing LCD module, obey the local environmental regulations.

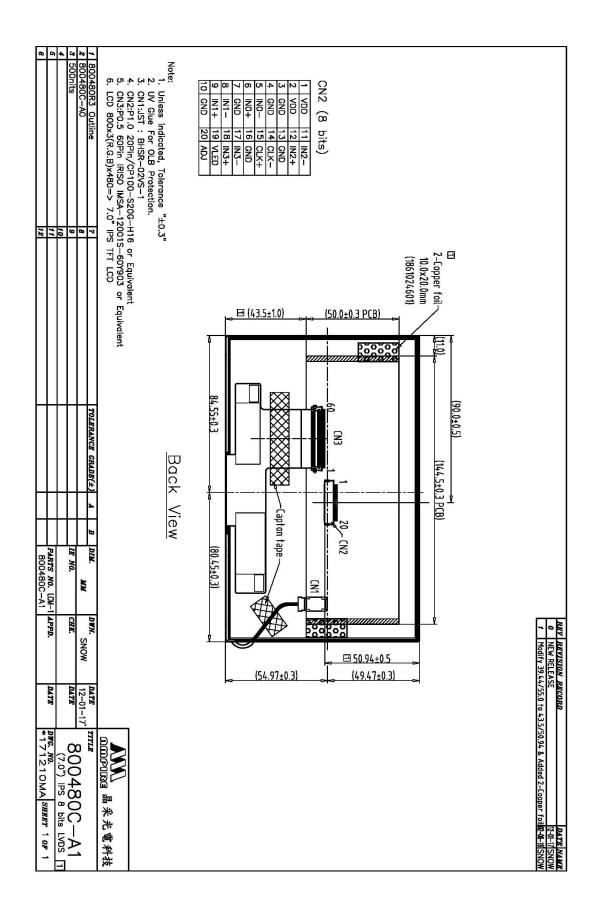

9.11 Others

Date: 2021/03/04

Do not keep the LCD at the same display pattern continually. The residual image will happen and it will damage the LCD. Please use screen saver.
