Avnet SOM LifeCycle

To Whom It May Concern;

Avnet has designed the MaaXBoard Single Board Computer products including MaaXBoard and MaaXBoard-Mini with a sustained product lifecycle in mind. It is our intent that these boards would be manufacturable for 10 years from their introduction and beyond in support of our customer's commercial product needs.

In the event of an individual BOM component obsolescence during the product lifecycle Avnet will make an effort to replace the affected component/s and continue to supply functionally and electrically compatible product. Required changes to active components will be communicated via a Product Change notice on our website (avnet.me/MAAXBOARD) 6 months prior to the change.

When business conditions make it necessary to discontinue a product an EOL notice will be issued with a lifetime buy opportunity enabling customers to secure inventory necessary to sustain their products.

It is difficult to predict the possible scenarios but Avnet is dedicated to supporting our customers. Our commitment is that if Avnet ever becomes unable or unwilling to support the requirements for these products we will provide the fabrication files enabling the customer to build to suit their own needs.

Let me know if you have questions.

Best Regards,

James Jaksich
